

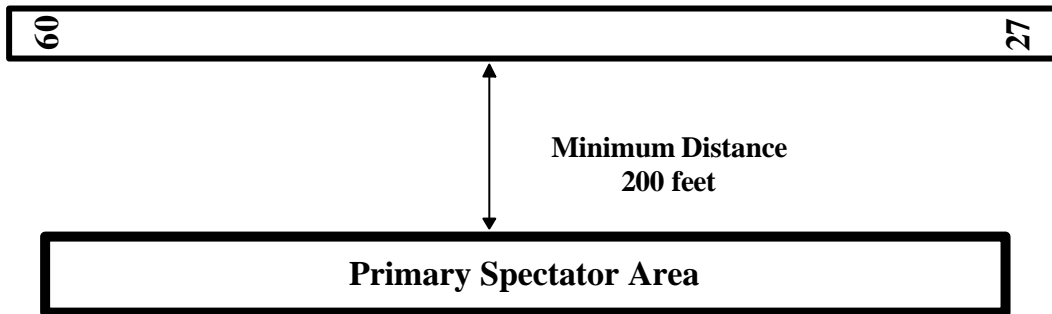

Diagram 2

Minimum Separation Distance Between Runway or Take Off Area and the Primary Spectator Area for Aeroplanes with Vref of 60kts or less and a certificated gross weight of 2500 lbs or less, ultra light aeroplanes and trikes, gliders and hang gliders

As per par. 623.07(3)(c), the minimum distances illustrated in this diagram for:

- a) single aircraft operations conducted on the centerline are to be measured to the runway centerline; and
- b) formation takeoff/landing operations, are to be measured to the runway edge.
