Mr. David Emerson

Review Chair

An editorial in today's Winnipeg Free Press has prompted me to contact your office.

Like many Canadians I do my fair share of air travel. I accept that as a member of the travelling public I am paying for much of the service provided that is necessary for a plane to land and take off full of passengers.

To reduce my costs and increase the service I receive I would whole heartedly encourage greater competition in the Canadian air travel industry. It is within the government's control to reduce regulation and do anything possible to improve the environment that the airlines are forced to do business in. I hope that your review results in changes that can make this happen.

Thank you.
